MFS assisting Transport SA with a partly submerged vessel

Thursday, 17 January 2008
8:15 pm

The Metropolitan Fire Service is assisting other agencies including the Department for Transport, Commercial Marine Services Section, at a partly submerged marine vessel at Port Adelaide, North Arm Marina.

Reported to MFS at around 4:30pm this afternoon, the 60 foot long old/ex commercial vessel is partly submerged due to a leak at the chine area of the boat in the hull.

MFS crews and the MFS marine vessel, the 'MV Gallantry', were called to assist with the pumping out of water and will remain on site as needed.
